Profile

R&D head advanced diffraction technology, electron microscopy, scientific instruments for life sciences. Honorary professor of physics.

Education

Faculty of Biology, Albert-Ludwigs-University Freiburg, Germany — Feb. 1996 - July 1999. PhD in natural sciences, specialization biophysics.

Department of Physics and Astronomy, University of Amsterdam, the Netherlands — Jan. 1989 - Aug. 1994. Master's in experimental physics, specialization in nuclear physics. (University of Leiden, the Netherlands, physics — Aug. - Dec. 1988)

Academic Appointments

Honorary professor of experimental physics, Department of Physics and Mechatronics Engineering, Saarland University, Saarbrücken, Germany — Sept. 2013 - present. (honorary prof. has half the teaching load of a full prof.)

Adjoint assistant professor of biophysics, VUMC — March. 2012 - Feb. 2015.

Assistant professor of biophysics, Department of Molecular Physiology and Biophysics, Vanderbilt University School of Medicine, Nashville, TN, USA (VUMC) — July 2007 - Dec. 2011.

Adjunct assistant professor of physics, Faculty of Physics and Astronomy, University of Tennessee, Knoxville, TN, USA (UTK) — Aug. 2006 - Dec. 2008.

Employment

Head advanced diffraction technology at Bruker AXS, Karlsruhe, Germany — April 2022 - present.

Senior group leader (tenured), Innovate Electron Microscopy, INM-Leibniz Institute for new Materials, Saarbrücken, Germany — Jan. 2012 - present.

Research staff, strategic hire, Materials Science and Technology Division, Oak Ridge National Laboratory, Oak Ridge, TN, USA (ORNL) — April 2005 - June. 2010.

Senior scientist, project leader, Philips Research, Eindhoven, the Netherlands — Jan. 2000 - March 2005 (scientist in 2000).

Post-doc, Faculty of Biology, Univ. Freiburg, — Aug. - Dec. 1999.

Research

A central scientific challenge of our time is to understand the molecular machinery underlying cellular function. My research program focuses on studying membrane protein function in whole mammalian cells using liquid-phase electron microscopy. Specific topics are growth factor receptors in breast cancer cells, and the stoichiometry of calcium channels. Secondly, we study processes involving nanomaterials at the solid-liquid interface. I have pioneered the technology of liquid-phase scanning transmission electron microscopy (STEM). Additional research involves innovations in three-dimensional-, and time-resolved electron microscopy. My group based in experimental physics and biophysics is interdisciplinary and includes also scientists with backgrounds in human/cell biology, chemistry, and image processing. I am responsible for a microscopy facility including aberration corrected STEM (ARM200, JEOL), environmental scanning electron microscopy, and fluorescence microscopy.

Honors

Visiting scientist, Radboud University Medical Center, Nijmegen, Netherlands — Nov. 2019 - present.
 Honoris Causa, National Institute of Applied Sciences (INSA), University of Lyon, France, Dec. 7, 2017.
 Quadrennial Life Sciences award of the European Microscopy Society 2016.
 MRS Innovation in Materials Characterization Award 2016 together with Frances Ross (IBM T. J. Watson Research Center) and Chongmin Wang (Pacific Northwest National Laboratory).
 Best Software and Instrumentation Paper 2018, Microsc. Microanal. 24, 8-16, 2018; Paper selected as Top 2011 Article, Scanning 33, 135-146; Best Instrumentation or Techniques Development Paper 2011, Microscopy and Microanalysis 17, 817-826.
 Esprit de Corps, community service category award, ORNL, Nov. 14, 2008; Innovation Award, ORNL, March 1, 2007.

Selected professional activities

Editor of research topic “Liquid phase electron microscopy of biological processes under physiological conditions”, Frontiers in Nanotechnology - Biomedical Nanotechnology. 2020 - present.
 Chair of the first Gordon Research Conference on Liquid Phase Electron Microscopy, Tuscany, Italy, Jan. 26 - 31, 2020.
 Member of the MRS Innovation in Materials Characterization Award subcommittee (2018-).
 Leading organizer of the bi-annual “Conference on In Situ and Correlative Electron Microscopy (CISCEM)”, INM, Saarbrücken, Germany, Oct. 2018; Oct. 2016; Oct. 2014; Nov. 2012.
 Abellan, P. & de Jonge, N., guest editors, special issue on electron microscopy in liquid, Micron, 2018;
 Guest editor of a special issue on electron microscopy in liquid for Microscopy and Microanalysis, 2014.
 Session chair of the symposium “In-situ and time-resolved microscopy” at the Microscopy Conference 2017, Lausanne, Switzerland, Aug. 21-25, 2017.
 Organizer of the symposium “Advances in 3D Electron Microscopy” at the Microscopy and Microanalysis meeting, Nashville, TN, USA, Aug. 7-11, 2011.
 Co-organizer of: the symposium “*In situ* transmission electron microscopy in liquid and gas cells” at the Microscopy and Microanalysis meeting, Baltimore, MD, USA, Aug. 2018; the symposium IM2 “Micro-Nano Lab and dynamic microscopy” at the European Microscopy Congress, Lyon, France, Aug. 2016; the symposium “Transmission EM and Spectroscopy at or near realistic conditions” at the Microscopy and Microanalysis meeting, Portland, OR, USA, Aug. 2010; the symposium “*In situ* Microscopy and Spectroscopy” at the MRS 2010 spring meeting, San Francisco, CA, USA, April 2010.
 Member of the editorial board of Microscopy and Microanalysis, June 2010 - present; Member of the editorial board of Ultramicroscopy, 2018 - present.
